

SERVICES

Multi-brand Services

Repairs

When you select Multi-brand Services, you quickly get help when a problem arises. During emergencies or planned production breaks, we will quickly repair and service your critical power equipment. The refurbishment process includes analysis, repair, testing and full restoration of the equipment to its proper operating condition.

Why Multi-brand Services?

With more than 30 years of experience as a master battery distributor, we offer only the highest quality VRLA and flooded batteries, monitoring, and service to ensure the continuity of your vital operations.

Proactive solutions

When the power fails you should be confident that your critical systems are ready to perform. Teaming with ABB proactively provides you with the assurance that your battery systems are well maintained and reliable. To maximize the longevity of your UPS, we can replace degraded batteries and AC and DC capacitors as well. Because we purchase parts directly from the manufacturers, we buy them at a lower cost and pass the savings on to you.

Quality care

Because your business relies heavily on the performance of your critical power systems, we are committed to providing you with premium service for all your critical power emergency needs. We dispatch qualified UPS and battery technicians to your site. Our fully-trained field engineers are equipped to handle multiple situations and are ready with an escalation plan should unforeseen problems arise. We also offer one of the most comprehensive warranty plans in the industry: full three year coverage on most of the batteries we sell.

Battery recycling

We are committed to a sustainable global environment, so all spent battery cores are sent to an EPA approved facility for recycling. A certificate showing your batteries were properly disposed of is also available.
